

Overview

The Devlin L-Cart has been designed to provide a flexible and cost conscious solution to the deployment of laptop computers in healthcare environments. Lightweight, ergonomic and highly manoeuvrable the L-Cart can be used seated or standing with maintenance-free gas strut height adjustment.

The universal laptop restraint system accepts screen sizes from 12" to 17" offering simple and secure (key or combination lock) laptop installation. The integrated cable management and charger compartment ensure the charger remains with the laptop and ready for use.

Smooth, solid surfaces allow fast and effective cleaning to aid infection control routines. A range of configuration options and a 3 year manufacturer warranty complete the package.

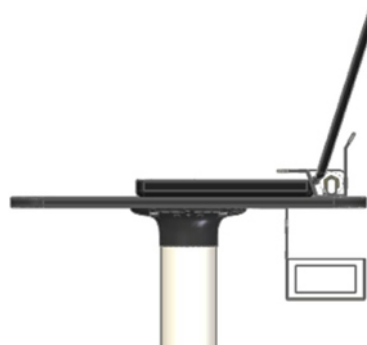

Key Features

- Ergonomic lightweight design with integrated handles
- Stable 5 arm chassis with easy glide rubber casters
- 2x opposing braked casters for safe static operation
- Fixed or user adjustable work-top height
- Integrated handles prevent snagging and enable easy positioning
- Simple, secure and universal laptop retention system
- Full access to laptop power button and all ports side, front and rear
- Configuration options include: gel holder, baskets and keyboard tray

Applications

- Electronic medical charting
- Electronic Patient Records (EPR)
- Electronic prescribing (ePrescribing)
- Phlebotomy data capture
